

Quality: A guide for stock pickers

In theory, quality investing makes a lot of sense in an uncertain world. In practice, it takes a great deal of skill and effort.

"I have the simplest tastes," Oscar Wilde declared. "I am always satisfied with the best."¹ Many successful investors, such as the legendary Philip Fisher, tend to take a similar approach to picking quality stocks. At a time of geopolitical, economic and technological uncertainties, the idea of compounding return by investing into a proven winner is appealing.²

Of course, that leaves the problem of how to recognize "the best." In identifying high-quality stocks, the traditional distinction has been in terms of metrics encompassing offensive and defensive characteristics. Offensive traits include durable growth, innovation leadership and management quality. Defensive strengths relate to a solid balance-sheet, financial flexibility and shareholder-oriented capital allocation. Especially over the last 30 years, new techniques have emerged to refine traditional measures of quality and value creation more precisely. These are constantly refined further, as : our understanding of equities is still in the making.³

Partly, that is because causality, when it comes to returns, can be quite tricky. A strong stock-market performance can be self-reinforcing by helping attract high-quality staff, leading to a "flywheel" of driving more innovation and better execution, thus generating stronger financial results and driving the share price higher. When buying a leading technology company in the late 1990s, it might already have seemed smart to look for a would-be Internet leader skillful at adopting the tools of technology and being capital lite. Extra points might have been awarded for sticky customer relationships, recurring revenues, high predictability in cash flows and the ability for self-funding. Still, an investor might well have endured periods of significant stock-price volatility with the leading e-commerce platform – and be in for many years of lean returns.

On the other hand, a company which delivered great returns for ages may all of the sudden struggle. "Nothing fails like success," as the business scholar Richard Pascale has argued.⁴ Even the best-managed companies with a stellar

track record, can become subject to what Clayton Christensen famously called "The Innovator's Dilemma."⁵ "In an age of disruption and fast-paced structural change, resiliency and adaptability are key quality criteria aside from hard financial metrics," argues Sebastian Werner, Head of Growth Equities, Americas at DWS.

Adaptability includes undertaking investments even in uncertain times. Having the support of long-term-thinking and patient investors who understand the need to prepare for the next wave and see the potential of new opportunities early on helps. Resilience means risk-preparedness, operationally and financially as well as via diversification. Just as a good defense enables a good and effective offense, resilience is a precondition for adaptability, as it creates financial flexibility. In combination with continuous improvement, this can create a virtuous cycle, enabling market leaders to profitably grow further, independent of the macroeconomic circumstances.

Identifying such potential long-term value creators involves qualitative assessments of management, organizational flexibility and effective corporate culture. This takes a great deal of skill and effort. Conversely, the potential rewards from correctly identifying long-term winners have rarely seemed larger with so many unknowns lying ahead.

Over the last ten years, quality has outperformed the broader market

Glossary

The [MSCI USA Quality Index](#) aims to capture the performance of quality growth stocks by identifying stocks with high quality scores based on three main fundamental variables: high return on equity (ROE), stable year-over-year earnings growth and low financial leverage.

The [S&P 500](#) is an index that includes 500 leading U.S. companies capturing approximately 80% coverage of available U.S. market capitalization.

The [total return](#) is a performance measure of an investment. It measures the earned income of an investment over a specific time period.

[Volatility](#) is the degree of variation of a trading-price series over time. It can be used as a measure of an asset's risk.

Important information – North America

The brand DWS represents DWS Group GmbH & Co. KGaA and any of its subsidiaries, such as DWS Distributors, Inc., which offers investment products, or DWS Investment Management Americas Inc. and RREEF America L.L.C., which offer advisory services.

This document has been prepared without consideration of the investment needs, objectives or financial circumstances of any investor. Before making an investment decision, investors need to consider, with or without the assistance of an investment adviser, whether the investments and strategies described or provided by DWS, are appropriate, in light of their particular investment needs, objectives and financial circumstances. Furthermore, this document is for information/discussion purposes only and does not and is not intended to constitute an offer, recommendation or solicitation to conclude a transaction or the basis for any contract to purchase or sell any security, or other instrument, or for DWS to enter into or arrange any type of transaction as a consequence of any information contained herein and should not be treated as giving investment advice. DWS, including its subsidiaries and affiliates, does not provide legal, tax or accounting advice. This communication was prepared solely in connection with the promotion or marketing, to the extent permitted by applicable law, of the transaction or matter addressed herein, and was not intended or written to be used, and cannot be relied upon, by any taxpayer for the purposes of avoiding any U.S. federal tax penalties. The recipient of this communication should seek advice from an independent tax advisor regarding any tax matters addressed herein based on its particular circumstances. Investments with DWS are

not guaranteed, unless specified. Although information in this document has been obtained from sources believed to be reliable, we do not guarantee its accuracy, completeness or fairness, and it should not be relied upon as such. All opinions and estimates herein, including forecast returns, reflect our judgment on the date of this report, are subject to change without notice and involve a number of assumptions which may not prove valid.

Investments are subject to various risks, including market fluctuations, regulatory change, counterparty risk, possible delays in repayment and loss of income and principal invested. The value of investments can fall as well as rise and you may not recover the amount originally invested at any point in time. Further-more, substantial fluctuations of the value of the investment are possible even over short periods of time. Further, investment in international markets can be affected by a host of factors, including political or social conditions, diplomatic relations, limitations or removal of funds or assets or imposition of (or change in) exchange control or tax regulations in such markets. Additionally, investments denominated in an alternative currency will be subject to currency risk, changes in exchange rates which may have an adverse effect on the value, price or income of the investment. This document does not identify all the risks (direct and indirect) or other considerations which might be material to you when entering into a transaction. The terms of an investment may be exclusively subject to the detailed provisions, including risk considerations, contained in the Offering Documents. When making an investment decision, you should rely on the final documentation relating to the investment and not the summary contained in this document.

This publication contains forward looking statements. Forward looking statements include, but are not limited to assumptions, estimates, projections, opinions, models and hypothetical performance analysis. The forward looking statements expressed constitute the author's judgment as of the date of this material. Forward looking statements involve significant elements of subjective judgments and analyses and changes thereto and/or consideration of different or additional factors could have a material impact on the results indicated. Therefore, actual results may vary, perhaps materially, from the results contained herein. No representation or warranty is made by DWS as to the reasonableness or completeness of such forward looking statements or to any other financial information contained herein. We assume no responsibility to advise the recipients of this document with regard to changes in our views.

No assurance can be given that any investment described herein would yield favorable investment results or that the investment objectives will be achieved. Any securities or financial instruments presented herein are not insured by the Federal Deposit Insurance Corporation ("FDIC") unless specifically noted, and are not guaranteed by or obligations of DWS or its affiliates. We or our affiliates or persons associated with us may act upon or use material in this report prior to publication. DB may engage in transactions in a manner inconsistent with the views discussed herein. Opinions expressed herein may differ from the opinions expressed by departments or other divisions or affiliates of DWS. This document may not be reproduced or circulated without our written authority. The manner of circulation and distribution of this document may be restricted by law or regulation in certain countries. This document is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, including the United States, where such distribution, publication, availability or use would be contrary to law or regulation or which would subject DWS to any registration or licensing requirement within such jurisdiction not currently met within such jurisdiction. Persons into whose possession this document may come are required to inform themselves of, and to observe, such restrictions.

Past performance is no guarantee of future results; nothing contained herein shall constitute any representation or warranty as to future performance. Further information is available upon investor's request. All third party data (such as MSCI, S&P & Bloomberg) are copyrighted by and proprietary to the provider.

For Investors in Canada: No securities commission or similar authority in Canada has reviewed or in any way passed upon this document or the merits of the securities described herein and any representation to the contrary is an offence. This document is intended for discussion purposes only and does not create any legally binding obligations on the part of DWS Group. Without limitation, this document does not constitute an offer, an invitation to offer or a recommendation to enter into any transaction. When making an investment decision, you should rely solely on the final documentation relating to the transaction you are considering, and not the [document – may need to identify] contained herein. DWS Group is not acting as your financial adviser or in any other fiduciary capacity with respect to any transaction presented to you. Any transaction(s) or products(s) mentioned herein may not be appropriate for all investors and before entering into any transaction you should take steps to ensure that you fully understand such transaction(s) and have made an independent assessment of the appropriateness of the transaction(s) in the light of your own objectives and circumstances, including the possible risks and benefits of entering into such transaction. You should also consider seeking advice from your own advisers in making this assessment. If you decide to enter into a transaction with DWS Group you do so in reliance on your own judgment. The information contained in this document is based on material we believe to be reliable; however, we do not represent that it is accurate, current, complete, or error free. Assumptions, estimates and opinions contained in this document constitute our judgment as of the date of the document and are subject to change without notice. Any projections are based on a number of assumptions as to market conditions and there can be no guarantee that any projected results will be achieved. Past performance is not a guarantee of future results. The distribution of this document and availability of these products and services in certain jurisdictions may be restricted by law. You may not distribute this document, in whole or in part, without our express written permission.

For investors in Bermuda: This is not an offering of securities or interests in any product. Such securities may be offered or sold in Bermuda only in compliance with the provisions of the Investment Business Act of 2003 of Bermuda which regulates the sale of securities in Bermuda. Additionally, non-Bermudian persons (including companies) may not carry on or engage in any trade or business in Bermuda unless such persons are permitted to do so under applicable Bermuda legislation.
