### **Important Information**

The Central and Eastern Europe Fund, Inc. is non-diversified and can take larger positions in fewer issues, increasing its potential risk. Investing in foreign securities presents certain risks, such as currency fluctuations, political and economic changes, and market risks. Emerging markets tend to be more volatile and less liquid than the markets of more mature economies, and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. Any fund that focuses in a particular segment of the market or region of the world will generally be more volatile than a fund that invests more broadly. This fund is non-diversified and can take larger positions in fewer issues, increasing its potential risk.

The New Germany Fund, Inc. is diversified and primarily focuses its investments in Germany, thereby increasing its vulnerability to developments in that that country.

Investing in foreign securities, particularly of emerging markets, presents certain risks, such as currency fluctuations, and risks of currency and capital controls, political and economic changes, and market risks. Any fund that concentrates in a particular segment of the market or a particular geographical region will generally be more volatile than a fund that invests more broadly.

The shares of most closed-end funds, including the Funds, are not continuously offered. Once issued, shares of closed-end funds are bought and sold in the open market through a stock exchange. Shares of closed-end funds frequently trade at a discount to net asset value. The price of a fund’s shares is determined by a number of factors, several of which are beyond the control of the fund. Therefore, a fund cannot predict whether its shares will trade at, below, or above net asset value.

War, terrorism, sanctions, economic uncertainty, trade disputes, public health crises and related geopolitical events have led, and, in the future, may lead to significant disruptions in US and world economies and markets, which may lead to increased market volatility and may have significant adverse effects on the funds and their investments.

This press release shall not constitute an offer to sell or a solicitation to buy, nor shall there be any sale of these securities in any state or jurisdiction in which such offer or solicitation or sale would be unlawful prior to registration or qualification under the laws of such state or jurisdiction.
