## Objective and strategy

The Xtrackers Harvest CSI 300 China A-Shares ETF seeks investment results that correspond generally to the performance, before fees and expenses, of the China Securities 300 Index (CSI 300 Index)\*\*. For years, restrictions by the Chinese government limited investing directly in Chinese equities known as China A-shares. Now, those restrictions are easing and investors willing to accept the risks associated with investing in China can access the growth potential of one of the world's fastest-growing economies – with Xtrackers Harvest CSI 300 China A-Shares ETF (ASHR), the first exchange-traded fund to offer U.S. investors direct access to the China A-shares universe.

**Performance quoted represents past performance and does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Shares are bought and sold at market price (closing price) not net asset value (NAV) and are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined) and do not represent the return you would receive if you traded at other times. To obtain the most recent month-end performance data visit [www.Xtrackers.com](http://www.Xtrackers.com) or call 855-329-3837.**

Indexes are unmanaged; you cannot invest in an index. Index performance is gross of fees and assumes dividend reinvestment. Inclusion of fees would have reduced returns.

\*\*The CSI 300 Index is composed of the 300 large- and mid-cap China A-Share stocks listed on the Shenzhen or Shanghai Stock Exchange.

\*\*\*The MSCI All Country World Index (ACWI) ex- USA is a market-capitalization-weighted index designed to provide a broad measure of stock performance throughout the world by tracking the performance of 22 developed and 24 emerging markets.

<sup>1</sup> Price-to-book ratio is a valuation ratio of a stock's market value compared to its book value.

<sup>2</sup> Price-to-earnings ratio (P/E) is a stock's current price divided by the company's trailing 12-month earnings per share from continuous operations.

<sup>3</sup> Dividend yield is a weighted-sum of the annualized dividends of the index components divided by the most recent index value. Annualized dividends are determined using a sum of all dividend announcements during the previous 12 months. Dividend yield is that of the China Securities 300 Index and is the rate of income generated by a stock in the form of dividends. The dividend yield of the index should not be considered the dividend yield of the fund. Past performance is no guarantee of future results.

DWS Group and Harvest Group have benefited from a successful Chinese foreign asset-management joint venture that was jointly established in 2005. Today, the continued strategic partnership between DWS and sub-advisor Harvest Global Investments Limited provides U.S. investors with the first ETF to access the expansive Chinese economy and stock market by directly holding China A-shares. The relationship between our two organizations allows us to leverage the strength of each respective firm. ALPS Distributors, Inc. is not affiliated with Harvest Group, Harvest Global Investments Limited or Harvest Fund Management Co. LTD.

The funds or securities referred to herein are not sponsored, endorsed, issued, sold or promoted by MSCI, and MSCI bears no liability with respect to any such funds or securities or any index on which such funds or securities are based. The Prospectus contains a more detailed description of the limited relationship MSCI has with DBX Advisors LLC and any related funds.

Xtrackers ETFs ("ETFs") are managed by DBX Advisors LLC (the "Adviser"), and distributed by ALPS Distributors, Inc. ("ALPS"). The Adviser is a subsidiary of DWS Group GmbH & Co. KGaA, and is not affiliated with ALPS. This ETF is sub-advised by Harvest Global Investments Limited. Shares are not individually redeemable, and owners of Shares may acquire those Shares from the Fund, or tender such Shares for redemption to the Fund, in Creation Units only. The brand DWS represents DWS Group GmbH & Co. KGaA and any of its subsidiaries such as DWS Distributors, Inc., which offers investment products, or DWS Investment Management Americas, Inc. and RREEF America L.L.C., which offer advisory services.

**Carefully consider the fund's investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the fund's prospectus, which may be obtained by calling 1-855-DBX-ETF (1-855-329-3837), or by viewing or downloading a prospectus from [www.Xtrackers.com](http://www.Xtrackers.com). Read the prospectus carefully before investing.**

**War, terrorism, economic uncertainty, trade disputes, public health crises (including the recent pandemic spread of the novel coronavirus) and related geopolitical events could lead to increased market volatility, disruption to U.S. and world economies and markets and may have significant adverse effects on the fund and its investments.**

**In addition, the U.S. government has imposed restrictions on the ability of U.S. investors to hold and/or acquire securities of certain Chinese companies. To the extent that an Underlying Index includes such a security and the Fund excludes it, the Fund's tracking error may increase and the performance of the Fund and Underlying Index may diverge.**

**Risk:** Investing involves risk, including the possible loss of principal. Stocks may decline in value. Funds investing in a single country generally are more volatile than more diversified funds. Special risks associated with investments in Chinese companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards the nature and extent of intervention by the Chinese government in the Chinese securities markets, and the potential unavailability of A shares. There is also a risk of the United States' government imposing limitations on investing in Chinese companies. Uncertainties in the Chinese tax rules governing taxation of income and gains from investments in A-shares could result in unexpected tax liabilities for the fund which may reduce fund returns. Any reduction or elimination of access to A-shares will have a material adverse effect on the ability of the fund to achieve its investment objective. Performance of the fund may diverge from that of the Underlying Index due to operating expenses, transaction costs, cash flows, use of sampling strategies or operational inefficiencies. An investment in the fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with the fund. Please read the prospectus for more information.
