Householding

In order to reduce the amount of mail you receive and to help reduce expenses, we generally send a single copy of any shareholder report and prospectus to each household. Stocks may decline in value. Any fund that concentrates in a particular segment of the market will generally be more volatile than a fund that invests more broadly. There are special risks associated with an investment in real estate, including REITS. These risks include credit risk, interest rate fluctuations and the impact of varied economic conditions. This Fund is non-diversified and can take larger positions in fewer issues, increasing its potential risk. Bond investments are subject to interest-rate, credit, liquidity, and market risks to varying degrees. When interest rates rise, bond prices generally fall. Credit risk refers to the ability of an issuer to make timely payments of principal and interest. Dividends are not guaranteed. The Fund may lend securities to approved institutions. Please read the prospectus for details.
