Householding

In order to reduce the amount of mail you receive and to help reduce expenses, we generally send a single copy of any shareholder report and prospectus to each household. Stocks may decline in value. Any fund that concentrates in a particular segment of the market will generally be more volatile than a fund that invests more broadly. There are special risks associated with an investment in real estate, including REITS. These risks include credit risk, interest rate fluctuations and the impact of varied economic conditions. Investing in foreign securities presents certain risks, such as currency fluctuations, political and economic changes, and market risks. Emerging markets tend to be more volatile and less liquid than the markets of more mature economies, and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. The Fund may lend securities to approved institutions. Please read the prospectus for details.

This report must be preceded or accompanied by a prospectus. We advise you to consider the Fund's objectives, risks, charges, and expenses carefully before investing.
