Performance is historical and does not guarantee future results. Investment returns and principal fluctuates so your shares may be worth more or less when redeemed. Current performance may be lower or higher than performance data quoted. Performance includes reinvestment of all distributions. Returns for periods of less than one year are cumulative. War, terrorism, sanctions, economic uncertainty, trade disputes, public health crises and related geopolitical events have led and, in the future, may lead to significant disruptions in U.S. and world economies and markets, which may lead to increased market volatility and may have significant adverse effects on the fund and its investments. Incorporation of ESG criteria in the fund's investment strategy does not guarantee a return or protect against a loss, limits the types and number of investment opportunities available to the fund and, as a result, the fund may underperform other funds that do not have an ESG focus. Investments in mutual funds involve risk. Stocks may decline in value. Bond investments are subject to interest-rate, credit, liquidity and market risks to varying degrees. Credit risk refers to the ability of an issuer to make timely payments of principal and interest. Investing in derivatives entails special risks relating to liquidity, leverage and credit that may reduce returns and/or increase volatility. Investing in foreign securities, particularly those of emerging markets, presents certain risks, such as currency fluctuations, political and economic changes, and market risks. There are additional risks associated with investing in commodities, high-yield bonds, aggressive growth stocks, non-diversified/ concentrated funds and small- and mid-cap stocks which are more fully explained in the prospectuses. See the prospectus for more information.
