

VIVE LA DIFFÉRENCE

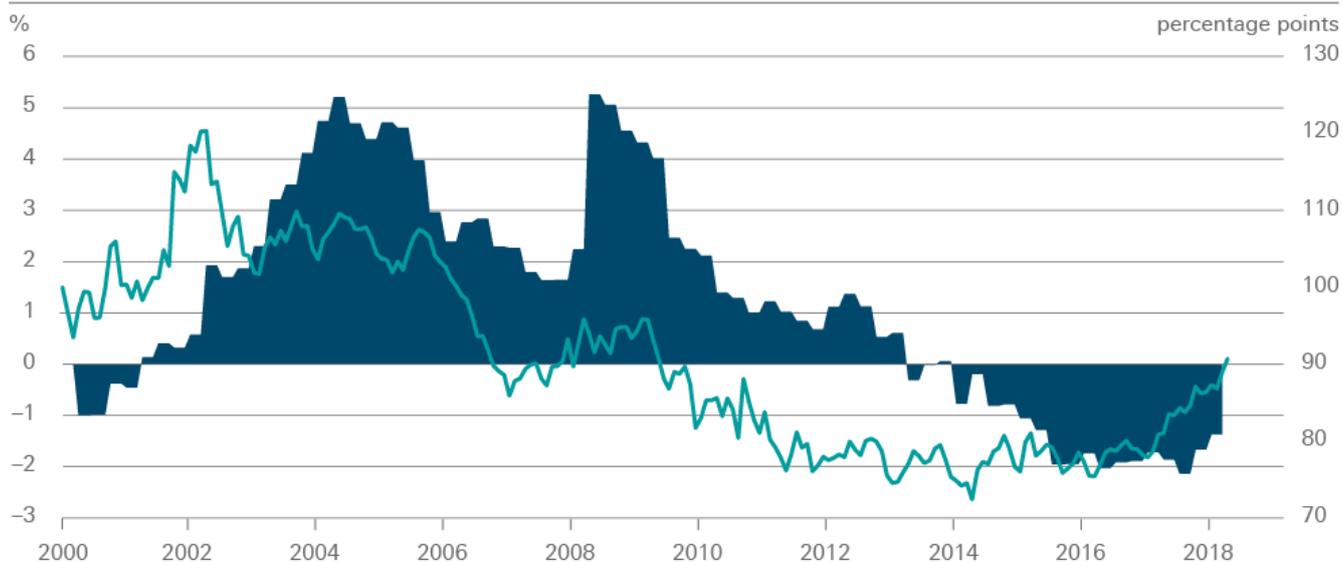

What might a Eurozone slowdown mean for equity markets? A closer look at France and Germany over the past 20 years reveals some interesting patterns.

Casual observers like to draw a direct link between a country's economic growth rates and the likely returns its equity market might offer. Reality often turns out a lot more complicated. For one thing, investors care about company earnings more than whole economies. Even domestically, earnings can grow – or shrink – more than an economy as a whole, depending on how company profitability develops. That is especially true at cyclical turning points. At the late stages of the economic cycle, it is not uncommon, for example, for low unemployment rates to create wage pressures, which companies might struggle to pass on. The economy might continue to grow – even overheat – for a little longer, but earnings growth might stall. Another issue concerns the growth of multi-national companies, which tend to make the bulk of their revenues and earnings outside their home country. And of course, national equity markets can differ a lot in terms of their sector composition.

For illustration of all these factors, our "Chart of the Week" shows the gross-domestic-product (GDP) growth rates and equity markets of France and Germany over the past 20 years. After 2002, France grew more quickly than Germany, but experienced a comparative slowdown from 2005 on-

wards. France was better able to cope with the Great Recession in 2009. Germany finally managed to catch up and surpass France in 2014. By contrast, French equities (as measured by both countries' MSCI indices) outperformed until late 2006, before taking a long and lasting nose-dive. That trend only began to sharply reverse over the past two years, just as the French economy began to outpace the German one.

The patterns in both countries' equity markets reflects the sources of both economic and earnings growth. Germany's economy and stock market are much more dependent on cyclical export goods, with heavy weightings for industrials, carmakers and materials such as chemicals. Financials also remain quite heavily weighted in Frankfurt when compared to the Paris stock exchange. The French market is arguably more balanced and defensive, with larger weightings for higher-margin consumer goods, thanks to strong French brand names. These tend to be much in demand in times of looming economic slowdowns. It goes to show that investors need to be careful when extrapolating from economic growth rates to any country's stock-market performance.

GLOSSARY

Equity market

A **market** in which **equities** (stocks) are traded. The term can be used to refer to an actual market (e.g. the New York Stock Exchange) or to general trends in equity trading. Equities are securities which certify rights of ownership of (parts of) a company.

Great Recession

The **Great Recession** refers to the prolonged economic downturn in much of the world after the financial crisis of 2007-08.

Gross domestic product (GDP)

The **gross domestic product (GDP)** is the monetary value of all the finished goods and services produced within a country's borders in a specific time period.

MSCI

MSCI is a company providing indices and other analytical tools for investors.

MSCI France Index

The **MSCI France Index** tracks the performance of French stocks.

MSCI Germany Index

The **MSCI Germany Index** tracks the performance of German stocks.

IMPORTANT INFORMATION

The brand DWS represents DWS Group GmbH & Co. KGaA and any of its subsidiaries, such as DWS Distributors, Inc., which offers investment products, or DWS Investment Management Americas Inc. and RREEF America L.L.C., which offer advisory services.

This document has been prepared without consideration of the investment needs, objectives or financial circumstances of any investor. Before making an investment decision, investors need to consider, with or without the assistance of an investment adviser, whether the investments and strategies described or provided by Deutsche Bank, are appropriate, in light of their particular investment needs, objectives and financial circumstances. Furthermore, this document is for information/discussion purposes only and does not and is not intended to constitute an offer, recommendation or solicitation to conclude a transaction or the basis for any contract to purchase or sell any security, or other instrument, or for Deutsche Bank to enter into or arrange any type of transaction as a consequence of any information contained herein and should not be treated as giving investment advice. Deutsche Bank AG, including its subsidiaries and affiliates, does not provide legal, tax or accounting advice. This communication was prepared solely in connection with the promotion or marketing, to the extent permitted by applicable law, of the transaction or matter addressed herein, and was not intended or written to be used, and cannot be relied upon, by any taxpayer for the purposes of avoiding any U.S. federal tax penalties. The recipient of this communication should seek advice from an independent tax advisor regarding any tax matters addressed herein based on its particular circumstances. Investments with Deutsche Bank are not guaranteed, unless specified.
