Chief Investment Officer &  
Strategist, Americas

### In a nutshell

- S&P near record, further upside needs healthy EPS growth to return in second half of the year

For the summer, we dial equity risk down a bit, look for fairly priced duration

Within equities, we stick with Emerging Markets & U.S. Growth OWs

Value has some catch-up potential, but growth is still preferred

For our sector strategy, we stick with U.S. Banks and Communications and incorporate Domestic Services as macro factor tilt

## Americas CIO View

### Summer with EM Asia and U.S. Banks & Communications

#### S&P near record, further upside needs healthy EPS growth to return in the second half of the year

The S&P 500 is flirting with its record high, we see the index as fairly but fully valued for now. If a new record is set soon, we think it only slightly exceeds 2018's September 2930 high. The sharp rally year-to-date is all from price-to-earnings (PE) expansion. Bottom-up consensus 2019 expectation S&P earnings per share (EPS) fell from \$175 at year start to \$168 now and the PE on this rose from 14.3 at year start to 17.3 now. First quarter S&P EPS is likely flat vs. last year assuming hearty beats. EPS growth should resume in 2Q albeit at a very slow pace. We expect the S&P to be range-bound (2750-2950) this summer through September until a bipartisan U.S. fiscal 2020 deal is struck this autumn and Britain finally legislates an orderly path for exiting the European Union (EU). When these deals pass and if the U.S. economy appears to be trending towards 2% gross-domestic-product (GDP) growth in 2019's second half and S&P EPS growth returns to a solid 5%+ trend, which we think likely but are not yet certain about, we would expect the S&P to rally to about 3000 by yearend or January. We fine tune our 2019E S&P EPS estimate to \$169 from \$170 with more details inside.

#### Summer Strategy: Dial equity risk down a bit, look for fairly priced duration

We think a 5%+ S&P price decline is unlikely near-term, but we trim our cyclical risk (beta) until the S&P is at or below the mid-point of the fair range we see for summer. We cut Equity allocation and raise Fixed Income and Alternatives. In equities we trim U.S., developed market (DM) and emerging market (EM). Within Fixed Income we trim high yield (HY) and add to short-duration. In Alternatives, we think real estate and infrastructure will perform well if the climb in 10yr yields is modest in late 2019 despite indications of a recession still being years away.

#### Summer Equity Strategy: Stick with Emerging Markets & U.S. Growth OWs

Despite the trim to our overall equity allocation, we maintain a large over-weight (OW) to Emerging Markets. We are equal to the slightest bit over-weight U.S. equities vs. our long-term norm and maintain a preference for large over small cap U.S. equities. We are moderately under-weight foreign developed equity markets. Our U.S. sector strategy and tilt toward EM Asia keeps our preference for Growth over Value. But our tilt to Growth is reduced a bit by lowering S&P Tech to equal-weight.

## **Growth still preferred vs. Value, but Value has some catch-up potential**

We believe that Growth will outperform Value for the rest of this long-lasting cycle. But for this summer, we see some catch-up potential for Value from big Banks, which we see as well deserved and retainable. There could be some catch-up at Industrials, Materials and Energy, upon a China trade deal with positive surprises and a further climb in oil prices. But we're skeptical about how much or retainable outperformance from Energy and Materials might be and these sectors remain at more risk to downside scenarios. We think oil prices will be challenged despite healthy EM demand to climb further the rest of this cycle given ample potential supply and the stability in China's growth comes with a shift from investment activity and construction related materials demand to consumer goods and services consumption.

## **Summer S&P Sector Strategy: Stick with U.S. Banks and Communications**

We believe the S&P is reaching the top of its spring rally, but we see further upside at big U.S. banks as chances of a 2019 federal-funds-rate cut fade away and the yield curve returns to a slight positive slope. We expect Comprehensive Capital Analysis and Review (CCAR) to confirm strong balance sheets at big banks and permit double-digit dividend hikes in the coming months. We maintain 400bp overweight (OW) on Financials and 300 basis points (bp) OW on Communications within the U.S. equity universe. We know that pricing power is pressured at many Communications companies, but we're attracted to the giant advertising-revenue capturing nets as we see their internet presence and services firmly rooted in consumers' lives. Elsewhere, we tilt to content vs. distribution on vast global selling opportunities. We reduce Technology and Health Care to equal-weight (EW) and raise Industrials, Consumer Staples, Real Estate and Utilities to EW. We stay under-weight (UW) Energy by 300bp and Consumer Discretionary and Materials by 200bp each.

## **Macro factor tilts incorporated in our sector strategy: Domestic Services**

In addition to our normalized earnings and fair intrinsic value estimates for all S&P sectors, we consider macro-factor exposures of our sector tilts. Our sector strategy is neutral beta vs. S&P, but still Growth tilted; what now stands out the most is that we prefer domestic exposure and service providers over foreign exposure and commodity producers and manufacturers. We see a firm dollar, tame inflation and slower but decent capital-expenditure (capex) growth that is more focused on boosting productivity than capacity. Cutting OWs on Tech and Health Care lowered our research and development (R&D) exposure. We're attracted to such intangible assets and will look for an opportunistic return to OW.

## Glossary

### Beta

**Beta** is a measure of volatility that captures a security's systematic risk according to the capital asset pricing model.

### Capital expenditures (capex)

**Capital expenditure (Capex)** are funds used by a company to acquire or upgrade physical assets such as property, industrial buildings or equipment.

### Duration

**Duration** is a measure expressed in years that adds and weights the time periods in which a bond returns cash to its holder. It is used to calculate a bond's sensitivity towards interest-rate changes.

### Earnings per share (EPS)

**Earnings per share (EPS)** is calculated as a company's net income minus dividends of preferred stock, all divided by the total number of shares outstanding.

### Emerging markets (EM)

**Emerging markets (EM)** are economies not yet fully developed in terms of, amongst others, market efficiency and liquidity.

### European Union (EU)

The **European Union (EU)** is a political and economic union of 28 member states located primarily in Europe.

### Federal funds rate

The **federal funds rate** is the interest rate, set by the Fed, at which banks lend money to each other, usually on an overnight basis.

### Fiscal policy

**Fiscal policy** describes government spending policies that influence macroeconomic conditions. Through fiscal policy, the government attempts to improve unemployment rates, control inflation, stabilize business cycles and influence interest rates in an effort to control the economy.

### Gross domestic product (GDP)

The **gross domestic product (GDP)** is the monetary value of all the finished goods and services produced within a country's borders in a specific time period.

### Growth strategy

A **growth strategy** is an investment style that is focused on an investor's capital appreciation through capital gains. Investors following this strategy seek to invest in companies whose earnings

R-050029-87 (4/19)

are expected to grow at an above-average rate compared to the industry or the overall market.

### High Yield (HY)

**High-yield** bonds are issued by below-investment-grade-rated issuers and usually offer a relatively high yield.

### Inflation

**Inflation** is the rate at which the general level of prices for goods and services is rising and, subsequently, purchasing power is falling.

### Price-to-earnings (P/E) ratio or multiple

The **price-to-earnings (P/E) ratio** compares a company's current share price to its earnings per share.

### Relative-value investing strategies

**Relative-value investing strategies** seeks to take advantage of price differentials between financial instruments by simultaneously buying and selling the different securities, thereby allowing investors to potentially profit from the "relative value."

### S&P 500

The **S&P 500** is an index that includes 500 leading U.S. companies capturing approximately 80% coverage of available U.S. market capitalization.

### Yield curve

A **yield curve** shows the annualized yields of fixed-income securities across different contract periods as a curve. When it is inverted, bonds with longer maturities have lower yields than those with shorter maturities.

## Important Information

The brand DWS represents DWS Group GmbH & Co. KGaA and any of its subsidiaries, such as DWS Distributors, Inc., which offers investment products, or DWS Investment Management Americas Inc. and RREEF America L.L.C., which offer advisory services.

This document has been prepared without consideration of the investment needs, objectives or financial circumstances of any investor. Before making an investment decision, investors need to consider, with or without the assistance of an investment adviser, whether the investments and strategies described or provided by Deutsche Bank, are appropriate, in light of their particular investment needs, objectives and financial circumstances. Furthermore, this document is for information/discussion purposes only and does not and is not intended to constitute an offer, recommendation or solicitation to conclude a transaction or the basis for any contract to purchase or sell any security, or other instrument, or for Deutsche Bank to enter into or arrange any type of transaction as a consequence of any information contained herein and should not be treated as giving investment advice. Deutsche Bank AG, including its subsidiaries and affiliates, does not provide legal, tax or accounting advice. This communication was prepared solely in connection with the promotion or marketing, to the extent permitted by applicable law, of the transaction or matter addressed herein, and was not intended or written to be used, and cannot be relied upon, by any taxpayer for the purposes of avoiding any U.S. federal tax penalties. The recipient of this communication should seek advice from an independent tax advisor regarding any tax matters addressed herein based on its particular circumstances. Investments with Deutsche Bank are not guaranteed, unless specified. Although information in this document has been obtained from sources believed to be reliable, we do not guarantee its accuracy, completeness or fairness, and it should not be relied upon as such. All opinions and estimates herein, including forecast returns, reflect our judgment on the date of this report, are subject to change without notice and involve a number of assumptions which may not prove valid.

Investments are subject to various risks, including market fluctuations, regulatory change, counterparty risk, possible delays in repayment and loss of income and principal invested. The value of investments can fall as well as rise and you may not recover the amount originally invested at any point in time. Furthermore, substantial fluctuations of the value of the investment are possible even over short periods of time. Further, investment in international markets can be affected by a host of factors, including political or social conditions, diplomatic relations, limitations or removal of funds or assets or imposition of (or change in) exchange control or tax regulations in such markets. Additionally, investments denominated in an alternative currency will be subject to currency risk, changes in exchange rates which may have an adverse effect on the value, price or income of the investment. This document does not identify all the risks (direct and indirect) or other considerations which might be material to you when entering into a transaction.
